

OKPARA112 IEP Participation

The Oklahoma Paraprofessional Courses are a series of 8 courses; all courses must be completed to receive credit on your course transcript. This course, OKPARA112, is the third course in this series.

This course will explain, in depth, the individualized education program (IEP). You will also learn about the paraprofessional's role in the IEP.

The individualized education program (IEP) is a written document that is developed for each eligible student with a disability. The IEP documents specially designed instruction and related services. The paraprofessional plays a key role in implementing a student's IEP by providing specific services and assessments documented in the IEP.

Paraprofessionals provide direct services to students every day. Because of their close daily work with individual students, paraprofessionals are good sources of information about a student's progress toward attaining IEP goals and objectives.

Course Outline

Session 1 – Introduction

- Introduction
